

Working together on efficient production

Experts in process valves and pneumatic control systems

WE CONTROL YOUR FLOW

We are Startflow

A young family-owned company with over 70 years of experience as an industrial supplier and service provider in the process industry. With a team of around 30 dedicated employees, we work every day to deliver tailored solutions for valve and control challenges in sectors such as the chemical and pharmaceutical industries.

Versatile across industries

Each industry comes with its own set of standards – from the strict regulations of the pharmaceutical and food industries to the safety-critical requirements of (petro)chemical operations. Thanks to years of hands-on experience across a wide range of applications, our specialists are well-versed in the latest industry standards.

From valves to control valves and custom sensors

Startflow offers an extensive range of high-quality process valves for applications across various industries. In addition to valves, we provide a wide selection of sensors and control technology. We exclusively partner with trusted suppliers known for their quality and reliability.

Diaphragm valves

Solenoid valves

Globe valves

Butterfly valves

Ball valves

Solenoid valves

Temperature regulators

Steam traps

Tank blanketing regulators

Pressure sensors

Diaphragm valves (Pharma)

Control valves (Pharma)

Pressure regulators (Pharma)

Sliding gate control valves

Sliding gate pressure regulators

Sanitary mixers

A photograph of a technician working on a control panel in a factory setting. The technician is a man with a beard, wearing a dark shirt and a watch, focused on his work. He is using a pair of pliers to adjust a component on the panel. The panel features several rows of electrical components, including relays and terminal blocks. The background shows a blurred industrial environment with various pieces of equipment. The entire image has a green color overlay.

„Our extensive experience and expertise in engineering, assembly, and maintenance enable us to deliver reliable and efficient solutions tailored to your specific needs.“

From concept to completion – all in one hand

In addition to consulting and supplying high-quality components, we're happy to take the load off your shoulders with our complementary services. From developing and building pneumatic control systems to diaphragm replacements, we manage your entire project – from idea through realization, installation, and on-site maintenance. Discover some of the services we offer.

ATEX Control Cabinets

Startflow's expertise in pneumatic control systems is especially valuable for use in explosive atmospheres, where equipment faces harsh conditions. Our control cabinets are ATEX-certified and fully compliant with the latest standards.

Process Skids

In addition to supplying high-quality components for the process industry, we also design and assemble process skids for the pharmaceutical and food industries. From panels with flow meters for coolant water control to CIP/ SIP distribution skids

Valve Repair Center

In our well-equipped workshop, featuring in-house test benches, we repair valves from various brands. Our technicians have extensive experience and receive ongoing training from our suppliers. We are proud to be one of the few certified Valve Repair Centers in Europe for Kühme, Gemü, Jordan Valve and Steriflow Valve.

Diaphragm Replacements

In the pharmaceutical industry, periodic replacement of diaphragms in diaphragm valves is standard practice. Startflow takes that burden off your shoulders. Our specialized service team performs these replacements quickly and meticulously, ensuring minimal downtime for your installation.

Van Stenis Group in a nutshell

Startflow is part of the Van Stenis Group. The name Van Stenis Group reflects the close collaboration between Luitec, Sellon, and Startflow – companies operating in the same industries, each with their own expertise. What unites us? All our products and services are focused on optimizing the “flow” within your production process.

SELLON

Sellon is your industrial service partner for improving reliability and extending the lifespan of your rotating equipment. In addition to providing expert service, Sellon is also your supplier of high-quality seals, industrial pumps and technical maintenance products.

LUI TEC

Luitec is your technical service provider specializing in compressed air systems, pumps and technical components. Looking for complete compressed air solutions? Luitec takes care of everything – from engineering and on-site installation to maintenance.

VAN STENIS SERVICES

Van Stenis Services is your maintenance provider for pumps, valves, and compressed air systems. With the combined expertise of technicians across the Van Stenis Group, we handle maintenance and troubleshoot issues to keep your installations running smoothly.
